

Ibex-4000 Series

SAFETY INFORMATION

REVISION

Revision	1.0
Date	14.03.2025

PACKAGE CONTENTS

Product	1 x Ibex-4xxx
Documentation	1 x Safety Information

LEGAL INFORMATION

Detailed technical characteristics and legal information as well as effective license provisions can be found in the Download Center (<https://downloadcenter.eltec.de/login>) on our website www.eltec.com.

EU Declaration of Conformity

Hereby, Westermo Eltec GmbH declares that the radio equipment type Ibex-4000 series is in compliance with Directive 2014/53/EU. The full text of the EU declaration of conformity is available at the following internet address: <https://downloadcenter.eltec.de/login>

SAFETY INFORMATION

- Please read the configuration and installation manuals carefully before installing and using any of our products, especially for output power and frequency bands of the radio modules. You can download the manuals after registration in the Download Center (<https://downloadcenter.eltec.de/login>) on our website www.eltec.com.
- Allow only appropriately trained personnel to handle the devices and observe the Electrostatic Discharge (ESD) protective measurements.
- Usage restriction: The designated product may only be used in an industrial environment (Class A product) in accordance with the specifications stated in the manuals.
- The device can become very hot during operation ($> 80^{\circ}\text{C}$).
 - Make sure the device is protected from accidental contact.
 - The device must be installed inaccessible to children.
 - For optimal heat dissipation the connectors should face downwards.
- Do not install the device close to any sources of heat, such as radiators or heating ducts.
- Keep the device away from any liquids and avoid exposure to dripping or splashing. The protection class of the housing is IP 54.
- The device can be operated with voltages higher than 60 VDC.
 - Incorrect handling can cause a fatal electrical shock.
 - Before connecting the power supply, connect the device to protective earth.
- To prevent the risk of electric shock, turn off the external power supply and remove the power supply cable from the electrical outlet before handling or disassembling the system.
- When connecting or disconnecting devices to or from the system ensure that the power cables of the devices are unplugged before the signal cables are connected. If possible, disconnect all power cables from the existing system before connecting the device.
- Before connecting or removing signal cables ensure that all power cables are unplugged.
- When using WLAN interfaces connect an appropriate antenna to the QLS built-in socket.
- At least 20 cm separation distance between the antenna and the user's body must be always maintained.
- This device is designed for use in all countries of the European Union and in Switzerland, Norway, Liechtenstein, Iceland and the United Kingdom.

RADIO FREQUENCIES AND TRANSMITTING POWER

WLAN	RANGE	MAX. POWER (E.I.R.P.)
2.4 GHz	2.4 - 2.483 GHz	20 dBm (100 mW)
5 GHz	5.15 - 5.35 GHz	23 dBm (200 mW)
	5.47 - 5.725 GHz	30 dBm (1000 mW)
5.8 GHz	5.725 - 5.875 GHz	14 dBm (25 mW) (SRD)
6 GHz	5.945 - 6.425 GHz	14 dBm (25 mW) (VLP)
		23 dBm (200 mW) (LPI)

The following restrictions are effective in the EU member states AT, BE, BG, CY, CZ, DE, DK, EE, EL, ES, FI, FR, HR, HU, IE, IT, LT, LU, LV, MT, NL, PL, PT, RO, SE, SI, SK.

- 5.15 - 5.25 GHz: intended only for indoor use including trains. 16 dBm (40 mW) maximum mean e.i.r.p. applies for installations inside train carriages with an attenuation loss on average of less than 12 dB.
- 5.25 - 5.35 GHz: intended only for indoor use inside buildings.
- 5.47 - 5.725 GHz: installations in trains are not permitted.
- 5.945 - 6.425 GHz: the customer must define the intended use and device category acc. to Commission Implementing Decision (EU) 2021/1067 of 17 June 2021.

Recommended antenna type and gain

WLAN Dipole antenna - 4.0 dBi

For further details about the setting of transmit powers please refer to the configuration manual.
